G.O.A.T. Speaker - Give your dog a voice!

Customize Responses, #Selfie Remote Button, Stream Music, Pet's Calendar

Birmingham, MI:

Our pets mean the world to us, and we often talk to them as though they can respond. But what if they could? Now, with *G.O.A.T. Speaker*, they can! *G.O.A.T. Speaker* is a brilliant new smartphone app and connected Bluetooth speaker. Simply clip the speaker to your dog's/pet's collar with our exclusive clip (designed and engineered in the USA) and let the fun begin!

G.O.A.T. Speaker (Greatest of All Time) is more than just a novelty app and incredibly sounding speaker, it is so much more! The speaker allows you to stream your favorite or your pet's favorite music, take priceless #selfies (no more Selfie Sticks!) just by pushing the remote camera/video button on the bottom of the speaker, organize your pet's busy schedule with their very own calendar and of course gives your pet their very own 'voice', you can use your personal voice recordings or customize their language and accent! As no-one knows your dog/pet quite like you, you can even add to the app with your own unique responses based on your furry friend's own personality that will respond for your pet via their G.O.A.T. Speaker clipped to their collar!

Your pet will be able to greet their friends by name...what will they say, when you ask to play fetch?

Offered in **Dog** or **Cat** designed adorable speakers with our included exclusive clip, USB charger, pet-parent option lanyard and code to unlock app. Affordable MSRP \$39.99 Exciting unveiling will be at Global Pet Expo Booth #5691. Guaranteed to be the 'TALK' of the show.
