February 20, 2017

FOR IMMEDIATE RELEASE

WILDLIFE SCIENCES WILL INTRODUCE TWO NEW FLY-THROUGH SUET FEEDERS AT THE GLOBAL PET EXPO'S TRADE SHOW.

Minnetonka, MN, "Fly-Through bird seed feeders are very popular at retail," explained Bill Gleason, President of Wildlife Sciences. "To date, no one has designed a Fly-Through style for suet feeding, so we decided to design our own. The feeders are attractive and durable with powder coated metal components and antiqued copper roofs. Our Fly-Through Suet Cake Feeder holds four standard suet cakes and the Fly-Through Suet Ball Feeder is designed for our unique Suet Balls."

"The Global Pet Expo is an excellent venue to introduce our new Fly-Through Suet Feeders," Gleason continued, "many retailers and distributors are already familiar with our innovative suet products. This show allows us to put these new items in front of a broad audience." Media and buyers attending the show can visit WILDLIFE SCIENCES at BOOTH 3901.
