Austin and Kat™ Debuts Their New Functional Line at Global

Seattle-based company Austin and Kat™, purveyor of hemp and CBD wellness biscuits and oils for pets, will showcase their new products at Global Pet Expo, booth # 6766

Pet wellness company Austin and Kat™ has added new treats and tinctures to their lineup with customization in mind, and they're at-the-ready to reveal and demonstrate their functional line at Global Pet Expo this February, 2020.

"It's our first time exhibiting at Global, and we're so excited to be apart of this community," says Kat Donatello, Founder and CEO. "Global Pet Expo is not only the largest expo for pets, but it's timing couldn't be more opportune. We are very honored to be showcasing our new products with other like-minded innovation in the pet space, and we're excited to share our latest developments."

As one of the first-to-market with their line of biscuits and oils using US-grown, quality hemp with naturally occurring CBD for pets, Austin and Kat™ felt the call to expand their product line as they experienced unprecedented growth. Their new products (each with a unique answer to your pets' very different, unique needs), will be located in the New Products Spotlight.

"We've found that like ourselves, each and every pet has their own personal needs. This line was developed with the idea that your pet deserves a bespoke product, all their own, to keep them at their very best," says Kat. "Our customers have been asking for more variety - this is our answer to those requests."

Each of the healthful and wholesome treats contain 10mg of organically-grown, full-spectrum CBD, combined with a variety of herbs and botanicals: four new biscuits, each with a specific purpose. All biscuits are certified wheat-free. Three varieties are also grain-free (Brady's Senior Blend is formulated with ancient grains).

Austin's Active Formula, named for the company's real life (and beloved) mascot, keeps your pup at-the-ready for any adventure. With healthy ingredients like salmon, blueberries, egg, and 10mg of CBD, this biscuit is an excellent way to keep your pup ready for action-packed activities and long days.

Bakko's Get Up and Go helps keep pets' joints mobile, with helpful standouts like New Zealand green mussel, wild Alaskan salmon oil, turmeric, and 10mg full-spectrum CBD combine to support joint health, muscle repair and mobility - perfect for pets who need just a bit more pep in their step.
