HIGHWAVE INC. INTRODUCES LEAK-TIGHT DOG WATER BOTTLE COLLECTION

ORLANDO, FL (2/27/2020)— Highwave invented the AutoDogMug® Original in 2014, and now has new leak-tight collection of the product. The AutoDogMug® Leak-Tight is a one-handed dog hydration system. Squeeze and water fills the bowl for your dog to drink, release and the excess water drains back into the bottle, not wasting a drop. This improved version has these features, comes in 3 different sizes, and has a leak-tight seal so when storing, water can't be accidentally be squeezed out.

The 44oz version comes in 4 colors, the 22oz version comes in 6 colors, & the 15oz version comes in 2 colors. Each comes with a carabiner to attach to a backpack, leash, or belt loop. All versions of the AutoDogMug® Leak-Tight are perfect for giving your dog water in the car or on the go and the bottle even fits in your car cupholder.

Highwave's mission for 35+ years has been to help humans live in harmony with our planet. The engineers at Highwave are constantly inventing reusable products that make our lives a little bit easier. Everything from our travel mugs for humans, to our travel mugs for dogs has been designed to respect the Earth and its natural resources.
