

**Never forget your pet's medication again!**

***NEW for 2020***

***Now available for your entire family.***

*Orlando, Feb 23, 2020.*

**GopherCap is an award-winning pill management smart bottle. The world's first and only smart device to be used for both pets and family health monitoring.**

“Forgetting to take a pill; be it medication, flea and tick treatment or a daily supplement is a big problem for a busy family”, says Joanne Watters, Managing Director of IDI. GopherCap's smart electronics record the date and time of every bottle opening. Use the free mobile app to set reminder schedules, medication types, pet's name, pet's photo and much more.

No need to wait to have your first GopherCap in-hand, you can now use the GopherCap mobile app available as a free download for Apple iPhone. Requires iOS 12.2 or later.

Compatible with iPhone, iPad and iPod touch. Visit Jen and Joanne at **booth #5381** to scan a GopherCap with your downloaded app and experience the excitement! ***(Be on the look-out for an Android version available September 2020.)***

Debuted at Global Pet Expo 2019 for pets only, the feedback we received inspired this **2020 launch** to have GopherCap now available for pets and family members, making wellness a top priority for every household.

About Intelligent Devices SEZC Inc.: IDI is the global sales subsidiary of Information Mediary Corp.,. The world leader in smart medication adherence solutions. All devices are fully certified, validated for professional applications such as clinical trials, community pharmacies and consumer use.
